## EDUCATION

---

### Michigan State University

Aug 2024 - Present

*PhD Computer Science and Engineering*

*East Lansing, US*

- CGPA: 4.00/4.00
- Award: University Distinguished Fellowship
- Research Area: Computer Graphics/Computer Vision/3D Deep Learning

### Habib University

Aug 2019 - May 2023

*BS Computer Science - Double Minor in Electrical Engineering and Mathematics*

*Karachi, PK*

- CGPA: 3.99/4.00, Rank: 1/114

## EXPERIENCE

---

### Mach9 Robotics

May 2026 - Aug 2026

*Perception Intern*

*San Francisco, USA*

- Researching neural architectures and representations for **vectorized 3D HD map construction** from LiDAR point clouds and urban imagery.
- Implemented **cyclic permutation-invariant matching** in a transformer decoder, enabling accurate closed-loop polyline prediction for traffic islands and curb rings.

### Michigan State University

Aug 2024 - May 2026

*Research Assistant*

*East Lansing, USA*

- Conducting research on **neural network-based geometry processing and modelling** under [Prof. Yiyong Tong](#)
- Designed and implemented an interactive neural shape editing framework for neural signed distance functions. Introduced tubular sampling and a stroke-based formulation, achieving versatile edits and up to a **15×** speedup over prior methods. Published in **High Performance Graphics 2025**
- Currently exploring gradient-domain processing techniques for alternate shape representations such as Geometry Images

### Max Planck Institute for Informatics

Jan 2024 - July 2024

*Visiting Research Intern*

*Saarbrücken, DE*

- Conducted research on **neural integration** under the supervision of [Dr. Thomas Leimkühler](#)
- Researched neural field-based approaches for learning repeated antiderivatives of multidimensional signals. Designed a **taxonomy of methods** for learning integrals supported by thorough experimental evaluation and analysis. Published and presented at **Vision Modelling and Visualization 2025**
- Applied learned integrals of motion signals, images, and 3D SDFs for signal filtering and image-based lighting

### Wolfram Research

Nov 2023 - May 2024

*Machine Learning Intern*

*Remote*

- **Audited Wolfram Language's machine learning functionality** against algorithms and concepts from standard ML textbooks and libraries and identified missing capabilities
- Implemented missing classification and regression metrics (Huber loss, Jaccard score, KL divergence) and evaluation visualizations (lift curves, calibration plots)
- Developed a **parameterized random data generator** for systematic testing of classification and clustering algorithms

### Farnevo

Aug 2023 - Dec 2023

*Machine Learning Engineer*

*Karachi, PK*

- Developed object detection based pipelines using YoloV8, DeTR, MaskRCNN models to improve crop detection on drone images of the field
- Implemented a **semi-supervised auto-labeling pipeline** for plant detection which improved accuracy by **+15%**
- Developed gap filling prescription algorithm which identified gaps in row crops up to **85%** accurately in dense fields

### Wolfram Summer School

Jun 2023 - Jul 2023

*Research Participant*

*Waltham, USA*

- Developed a **monocular 3D human pose estimation pipeline** by combining CenterNet-based 2D keypoint detection with MiDaS monocular depth estimation
- Reconstructed and interactively visualized 3D human skeletons from RGB images in the Wolfram Language
- Published the results in the [Wolfram Summer School 2023 Proceedings](#)

### National Resource for Network Biology, Google Summer of Code

Jun 2022 - May 2023

*Google Summer of Code Contributor*

*Remote*

- Worked with [Prof. Pedro Mendes](#) and [Dr. Hasan Baig](#) on **Cloud-COPASI**, a biological analysis platform
- Redesigned Cloud-COPASI to **streamline HPC job submissions** without requiring complex SSH configuration
- Implemented **COPASI compute pools on AWS Cloud**, enabling non-HPC affiliated users to run large simulations

## AWARDS AND HONORS

---

|                                                                                                                                                                  |                                             |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>NSF Research Traineeship</b><br>Selected as NSF NRT Fellow for AI and Data enabled predictive Multiscale Modeling                                             | <b>Michigan State University, 2026-2027</b> |
| <b>Phi Kappa Phi Membership</b><br>Nation’s oldest and largest all-discipline honors society membership based on excellence                                      | <b>Michigan State University, 2026</b>      |
| <b>Tau Beta Pi Membership</b><br>National engineering honor society membership for academic and professional excellence                                          | <b>Michigan State University, 2025</b>      |
| <b>University Distinguished Fellowship</b><br>Prestigious five-year fellowship awarded to 40 exceptional incoming graduate students                              | <b>Michigan State University, 2024</b>      |
| <b>Chancellor’s Yohsin Medal</b><br>For graduating with highest honor of excellent academics and metacurriculars                                                 | <b>Habib University, 2023</b>               |
| <b>Dean’s Medal</b><br>For graduating with the highest CGPA in Computer Science Program                                                                          | <b>Habib University, 2023</b>               |
| <b>Best Research Award</b><br>For producing the best research publication in Computer Science                                                                    | <b>Habib University, 2023</b>               |
| <b>Dean’s Honor List</b><br>For being one of the top 10% students in the program each semester                                                                   | <b>Habib University, 2020-2022</b>          |
| <b>President’s Honor List</b><br>For maintaining position on Dean’s Honor List in consecutive semesters                                                          | <b>Habib University, 2021-2022</b>          |
| <b>2nd Position in Speed Programming, CyberSecurity Hackathon</b><br>Awarded by president of Pakistan for securing first runner up position in speed programming | <b>Ignite, 2021</b>                         |
| <b>Bronze Medalist in ICPC Regionals</b><br>For excellent performance in International Collegiate Programming Contest, Topi Regionals                            | <b>ICPC, 2022</b>                           |
| <b>HU-TOPS Merit Scholarship</b><br>100% scholarship for four years awarded to top 50 students from all over Pakistan                                            | <b>Habib University, 2019-2023</b>          |
| <b>First Position in National Examinations</b><br>Securing highest grade nationwide in high school examinations with distinctions in mathematics and chemistry   | <b>AKUEB, 2019</b>                          |

## ACADEMIC SERVICES

---

- **Organizer/Demonstrator** for Girls Math and Science Day, MSU, 2026
- **Teaching Assistant at Michigan State University** for CSE335 Object-oriented Software Development, 2025-2026
- **Section Instructor, Stanford University** for CS106A Code in Place course in 2023 and 2024 (remote)
- **Teaching Assistant at Habib University for 6 courses:** Natural Language Processing, Linear Algebra, Nature of Computation, Discrete Mathematics, Object Oriented Programming and Computer Science Freshman Seminar
- **Programming Fundamentals Workshop Facilitator** for incoming computer science class of 2025, Habib University
- **Programming Bootcamp Instructor** for middle school students at Aga Khan School
